- English (Fluent)
- Urdu (Fluent)

PROFILE

I'm a seasoned Frontend Web Developer who's really good at using HTML, CSS, JavaScript, React JS, WordPress and Basic SQL. I love making websites look awesome and work smoothly by combining cool designs with clean, efficient code. I excel at bringing complex design concepts to life online, focusing on every little detail to ensure a user-friendly experience.

WORK EXPERIENCE

1 - 2 Years of work experience

Staying Ahead in Web Development   2024 - PRESENT

- I make it a point to stay updated with the latest in JavaScript, React, WordPress trends and techniques. It's not just about keeping pace; it's about using new knowledge to make my projects even better.
- When it comes to JavaScript and React, I'm not one to wait around. I'm the initiator, diving headfirst into projects that showcase not only my foundational skills but also my hunger to learn and innovate.
- Additionally, I have experience in utilizing WordPress to craft and personalize websites, seamlessly integrating JavaScript to elevate user experiences.

Advanced React Frontend Developer   2023 - 2024

- Created awesome user interfaces with React.js, focusing on making them easy to use and look great.
- Managed data like a pro with MySQL, making sure everything is organized and works smoothly behind the scenes.

Crafting Online Experiences   2022 - 2023

- I worked on making websites better for promoting stuff online. I used different tools like HTML, CSS, JavaScript, and React to do this. It was like mixing ingredients to cook up something awesome!
